

AHFS Drug Information Databases

Advancing Evidence-Based Medicine

Superior Content for Superior Clinical Decision Support

AHFS Drug Information is a unique and essential reference for healthcare professionals. It is the only referential drug information in the field that is published by a non-profit, scientific society. All the information is evidence-based and widely vetted through the industry's most meticulously evaluated editorial process. The superior quality and extensive detail of the information in *AHFS DI* is ideally suited for healthcare professionals who require the most comprehensive and authoritative resource.

- Over 1,200 monographs on over 50,000 drug products
- The latest commentary on a wide array of FDA-approved uses
- Unlabeled uses linked to evidence-based references
- 79,000 references linked to more than 555,000 content elements
- 50,000 references with hyperlinks to PubMed citations in the National Library of Medicine's database for access to full-text of articles
- 5,000 references with direct hyperlinks to PubMed Central's free full-text articles
- Drug interactions, cautions, and toxicity alerts
- Detailed information on dosage and methods of administration
- Thorough examination of well-established laboratory and test inferences
- Rigorous investigation of chemistry and stability
- Scientific coverage of pharmacology and pharmacokinetics
- Regular updates incorporate official therapeutic guidelines from National Institutes of Health, Centers for Disease Control, American Heart Association, American Academy of Family Practice, and dozens of other medical societies.
- Complete lists of commonly available prescription, OTC, ophthalmic, and dermatologic drugs, in addition to vitamins. *AHFS DI* is written and published by the professional pharmacy association, ASHP—without the influence of manufacturers, insurers, regulators, or other interested parties.
- Licensing our NDC database will allow you to quickly and accurately map our monograph data to a point of care vendor system while reserving manpower for other components of your development project.

AHFS DI has been:

- Designated an official compendium by the U.S. Congress for reimbursement determinations on unlabeled uses.
- Officially adopted by the U.S. Public Health Service and Department of Veterans Affairs.
- Formally recognized by the U.S. Congress and Centers for Medicare and Medicaid Services.
- Recommended by the National Association of Boards of Pharmacy.
- Included in Medicare's standards.
- Approved by the American Pharmaceutical Association, the American Health Care Association, the American Hospital Association, and the Catholic Health Care Association of the United States.

"I have considered AHFS the best single source of drug information available to the world for many years. It is complete, unbiased and extremely useful with information that is frequently unavailable from other sources. There is nothing that compares. Plus it's always accurate and always available."

**R. David Anderson,
B.S., RPh. Pharm., DSc.**
