

AHFS DI Essentials Database

Advancing Evidence-Based Medicine

Authoritative Answers for Nurses, Doctors, Pharmacists and Technicians

Developed especially for point-of-care access, *AHFS Drug Information® Essentials™* is a distillation of the leading source of evidence-based drug information for health care professionals: *AHFS Drug Information®*. This mid-size reference is a flexible, easy-to-use clinical guide designed to provide concise, authoritative answers for nurses, doctors, pharmacists and technicians.

Key Features:

- Adapted for point-of-care use from the most trusted pharmacy drug reference, *AHFS Drug Information®*.
- Remains the only evidence-based drug reference for frontline healthcare professionals
- Saves time by presenting data in a clear, straightforward format
- Provides quick access to information about compatibility, dosing and administration
- Reduces calls to the pharmacy for clarification
- Contains information on the vaccinations and treatments for the Avian Influenza
- Aids in advising patients and their families
- Lists drug interactions alphabetically
- Indicates drug compatibility and interactions in tables
- Separates adult and pediatric dosages by disease
- Provides separate drug monographs for systemic, topical, and EENT drug formulations
- Uses bullet points and color-enhanced graphics
- Presents complex dosage information in tables
- Contains patient advice sections (nursing actions)
- Includes complete labeled and off-label uses
- Pairs recommended actions with cautionary information
- Black box warnings are clearly identified at the top of monograph
- Licensing our NDC database will allow you to quickly and accurately map our monograph data to a point of care vendor system while reserving manpower for other components of your development project.

AHFS DI Essentials Database provides separate drug monographs for systemic, topical, and EENT drug formulations and remains the only compendium-based drug reference for frontline healthcare professionals.

AHFS Drug Information is the foundation of three out of the top four drug databases ranked "superior in scope and completeness" in a recent study of eight subscription drug databases.
