Handbook on Injectable Drugs Database

Lawrence A. Trissel

The ultimate authority on compatibility and stability of injectable drugs. This trusted reference provides quick and accurate assessments of the compatibility of various solutions and additives with a given parenteral drug. Each monograph provides a listing of trade names; product information, including sizes, strengths, volumes, and forms in which the drug is supplied; administration guidelines; stability and storage requirements; and compatibility information. No other drug reference examines parenteral drug stability and compatibility in such extensive detail.

Key Features:

- Available in XML Fully referenced
- Most comprehensive, widely used injectable drug guide on the market
- Over 370 drug monographs, including 47 non-U.S. drugs
- Drugs listed alphabetically by generic name for efficient searching, with brand names also listed
- AHFS classification numbers for each drug conveniently refers users to in-depth therapeutic data in *AHFS Drug Information*
- Tabulated results from primary research on the compatibility of the listed drug with infusion solutions and other drugs
- Four compatibility tables are provided for each drug: solution, additive, syringe, and Y-site
- Storage requirements and general stability information, including pH, freezing, exposure to light, sorption and filtration characteristics, and repackaging information
- Key product data including common sizes, strengths, volumes, and forms in which the drug is supplied. Also includes pH, osmotic value, and other important product information
- Licensing our NDC database allows you to quickly and accurately map our monograph data to a point of care vendor system while reserving manpower for other components of your development project.

AHFS Drug Information is the foundation of three out of the top four drug databases ranked "superior in scope and completeness" in a recent study of eight subscription drug databases.

"The gold standard reference for compatibility/stability of injectable drugs. A 'must have' reference for academia, drug information centers, hospitals, and long-term care facilities."

Katie J. Suda, PharmD
Associate Professor
Director, Drug Information
Center
University of Tennessee
